The 30-second version

- **Solid base:** 5★ across 13 Google reviews.
- **But you sit at #58 for "garage door repair"** when searched from downtown St. Louis.
 - Compared with the top 3: they have 28–601 Google reviews vs your 13; you list 1 extra Google category (#2 lists 7); they show 22–168 profile photos vs your 6.
- **Quick fixes:**
 1. Add 2–3 accurate extra categories to your Google profile.
 2. Add 30+ real job photos (you have 6).
 3. Ask every customer for a Google review with a direct link.

4. What I'd fix first

1. **Add extra categories.** You list only "Garage door supplier". The top 3 also use: Contractor, Door supplier, Garage builder, Material handling equipment supplier, Property maintenance, Repair service, Spring supplier. Add only the ones that are true for your business. (5 min)
2. **Photos: 6 → 50+.** Real before/after jobs, trucks, team and shop, uploaded steadily rather than all at once. (ongoing)
3. **Steer reviews to Google.** Text your direct Google review link after every job and reply to every review. The gap to the top 3 is volume, not quality. (script included in Fix Pack)
4. **Website relevance:** put "Garage Door Repair" and "St. Louis" in the homepage title; add an "Areas we serve" section with the suburbs you actually cover.

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "St. Louis, MO" (downtown point), "garage door repair" to depth 105, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
