The 30-second version

- **Solid base:** 4.5★ across 14 Google reviews.
- **But you sit at #86 for "garage door repair"** when searched from downtown Kansas City.
 - Compared with the top 3: no LocalBusiness schema on your homepage.
- **Quick fixes:**
 1. Tighten the homepage for "garage door repair" + city.

1. Where you show up on Google Maps

Search (from downtown Kansas City)	Your position	#1
garage door repair	#86 of 146	Kansas City Garage Door Repair
garage door opener repair	#80 of 100	Precision Overhead Garage Door Service
garage door spring repair	#76 of 100	Kansas City Garage Door Repair

Grid check (25-point coverage map): not checked for this audit.

2. You vs. the top 3 ("garage door repair", downtown Kansas City)

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

3. Website (mobile)

Check	Result
Page title	✔ "Bousman Door – Kansas City Garage Door Service and Sales"
Main headline (H1)	⚠ no H1 found on homepage
Tap-to-call link	✔ 8165366841
LocalBusiness schema	⚠ not found
Suburb/area coverage	⚠ homepage mentions 0 nearby suburbs
HTTPS	✔
Mobile speed (Lighthouse lab)	Performance 48/100 · SEO 46/100 · LCP 6.7 s · page weight 833 KiB

4. What I'd fix first

1. **Website relevance:** change the main headline (H1) to name the service and city; add LocalBusiness schema (address, hours, area served); add an "Areas we serve" section with the suburbs you actually cover; speed up the mobile homepage (lab score 48/100).

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Kansas City, MO" (downtown point), "garage door repair" to depth 146, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
