Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

4. What I'd fix first

1. **Add a booking or quote-request link** to your Google profile (your contact/quote page works if you don't use online booking). (5 min)
2. **Steer reviews to Google.** Text your direct Google review link after every job and reply to every review. The gap to the top 3 is volume, not quality. (script included in Fix Pack)
3. **Website relevance:** speed up the mobile homepage (lab score 42/100).

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Columbus, OH" (downtown point), "garage door repair" to depth 147, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.

- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
