The 30-second version

- **Your reviews are strong:** 5★, with 223 of your 224 reviews at 5 stars.
- **But you sit at #33 for "garage door repair"** when searched from downtown Kansas City.
 - Compared with the top 3: your profile shows weekends closed while 2 of the top 3 list 24/7; no LocalBusiness schema on your homepage; your homepage scores 35/100 for mobile speed (Lighthouse lab).
- **Quick fixes:**
 1. Tighten the homepage for "garage door repair" + city.
 2. Make sure your profile hours match when you actually answer the phone.

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

3. Website (mobile)

Mobile speed (Lighthouse lab)	Performance 35/100 · SEO 73/100 · LCP 9.6 s · page weight 2,254 KiB

4. What I'd fix first

1. **Website relevance:** put "Garage Door Repair" and "Kansas City" in the homepage title; add LocalBusiness schema (address, hours, area served); add an "Areas we serve" section with the suburbs you actually cover; speed up the mobile homepage (lab score 35/100).
2. **Hours:** if you take calls evenings or weekends, list those hours. Profiles shown as closed can drop out of "open now" searches. (*Only list hours you really answer.*)

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Kansas City, MO" (downtown point), "garage door repair" to depth 146, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.

- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
