The 30-second version

- **Your reviews are strong:** 5★, with 42 of your 43 reviews at 5 stars.
- **But you sit at #11 for "garage door repair"** when searched from downtown Cincinnati.
 - Compared with the top 3: your /schedule-service/ page isn't linked as a booking link on your Google profile (1 of the 3 has one); they show 58–250 profile photos vs your 22; your profile shows weekends closed while 3 of the top 3 list 24/7.
- **Quick fixes:**
 1. Link your existing booking page from your Google profile.
 2. Add 30+ real job photos (you have 22).
 3. Speed up the mobile homepage.

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

4. What I'd fix first

1. **Add your booking page to your Google profile** as the booking/appointment link. (5 min)
2. **Photos: 22 → 50+.** Real before/after jobs, trucks, team and shop, uploaded steadily rather than all at once. (ongoing)
3. **Website relevance:** speed up the mobile homepage (lab score 32/100).
4. **Hours:** if you take calls evenings or weekends, list those hours. Profiles shown as closed can drop out of "open now" searches. (Only list hours you really answer.)

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Cincinnati, OH" (downtown point), "garage door repair" to depth 72, pulled Thu Oct 8, 2026 ~4:42 PM ET. Opener and spring searches pulled the same way.

- Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
