The 30-second version

- **Your reviews are strong:** 5★, with 101 of your 102 reviews at 5 stars.
- **But you sit at #44 for "garage door repair"** when searched from downtown Indianapolis.
 - Compared with the top 3: you list 1 extra Google category (#2 lists 7); your homepage title ("Harts Garage Door Services") doesn't mention your city; no LocalBusiness schema on your homepage.
- **Quick fixes:**
 1. Add 2–3 accurate extra categories to your Google profile.
 2. Tighten the homepage for "garage door repair" + city.

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

3. Website (mobile)

Check	Result
Page title	⚠️ "Harts Garage Door Services"
Main headline (H1)	✅ "Expert Garage Door Solutions for Every Home & Business"
Tap-to-call link	✅ 13179101092
LocalBusiness schema	⚠️ not found
Suburb/area coverage	⚠️ homepage mentions 1 nearby suburbs (Avon)
HTTPS	✅
Mobile speed (Lighthouse lab)	not checked

4. What I'd fix first

1. **Add extra categories.** You list only "Garage door supplier". The top 3 also use: Contractor, Door supplier, Garage builder, Material handling equipment supplier, Property maintenance, Repair service, Spring supplier. Add only the ones that are true for your business. (5 min)
2. **Website relevance:** put "Garage Door Repair" and "Indianapolis" in the homepage title; add LocalBusiness schema (address, hours, area served); add an "Areas we serve" section with the suburbs you actually cover.

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Indianapolis, IN" (downtown point), "garage door repair" to depth 86, pulled Thu Oct 8, 2026 ~4:42 PM ET. Opener and spring searches pulled the same way.

- Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
