No one can guarantee rankings. These fixes target what you control.

How this was measured

- Google Maps rankings: DataForSEO Google Maps API, desktop, English, Google location "Columbus, OH" (downtown point), "garage door repair" to depth 147, pulled Thu Oct 8, 2026 ~4:42 PM ET. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- Profile data (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- Website: homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked (verifiy) is an inference we couldn't confirm from the data.
