The 30-second version

- **Your reviews are strong:** 4.8★, with 34 of your 36 reviews at 5 stars.
- **But you sit at #21 for "garage door repair"** when searched from downtown Milwaukee.
 - Compared with the top 3: you list no extra Google categories (they list 1–3); they show 41–169 profile photos vs your 14; your homepage title ("Keith and Sons Overhead Doors") doesn't mention "garage door" or your city.
- **Quick fixes:**
 1. Add 2–3 accurate extra categories to your Google profile.
 2. Add 30+ real job photos (you have 14).
 3. Tighten the homepage for "garage door repair" + city.

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

3. Website (mobile)

4. What I'd fix first

1. **Add extra categories.** You list only "Garage door supplier". The top 3 also use: Door supplier, Garage builder, Repair service, Service establishment. Add only the ones that are true for your business. (5 min)
2. **Photos: 14 → 50+.** Real before/after jobs, trucks, team and shop, uploaded steadily rather than all at once. (ongoing)
3. **Website relevance:** put "Garage Door Repair" and "Milwaukee" in the homepage title; change the main headline (H1) to name the service and city; add LocalBusiness schema (address, hours, area served); add an "Areas we serve" section with the suburbs you actually cover; make the phone number a tap-to-call link.

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Milwaukee, WI" (downtown point), "garage door repair" to depth 79, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
