The 30-second version

- **Solid base:** 4.3★ across 37 Google reviews.
- **But you sit at #43 for "garage door repair"** when searched from downtown Cincinnati.
 - Compared with the top 3: no booking link on your Google profile (1 of the 3 has one); they show 58–250 profile photos vs your 4; your profile shows weekends closed while 3 of the top 3 list 24/7.
- **Quick fixes:**
 1. Add a booking or quote-request link to your Google profile.
 2. Add 30+ real job photos (you have 4).
 3. Tighten the homepage for "garage door repair" + city.

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

4. What I'd fix first

1. **Add a booking or quote-request link** to your Google profile (your contact/quote page works if you don't use online booking). (5 min)
2. **Photos: 4 → 50+.** Real before/after jobs, trucks, team and shop, uploaded steadily rather than all at once. (ongoing)
3. **Website relevance:** put "Garage Door Repair" and "Cincinnati" in the homepage title; change the main headline (H1) to name the service and city; add LocalBusiness schema (address, hours, area served); add an "Areas we serve" section with the suburbs you actually cover; speed up the mobile homepage (lab score 49/100).
4. **Hours:** if you take calls evenings or weekends, list those hours. Profiles shown as closed can drop out of "open now" searches. (Only list hours you really answer.)

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Cincinnati, OH" (downtown point), "garage door repair" to depth 72, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
