The 30-second version

- **Your reviews are strong:** 5★, with 472 of your 479 reviews at 5 stars.
- **But you sit at #20 for "garage door repair"** when searched from downtown Louisville.
 - Compared with the top 3: they show 75–311 profile photos vs your 34; your profile shows weekends closed while 2 of the top 3 list 24/7; your homepage title ("Mount Washington Garage Door – Custom Doors That Fit Your Ho...") doesn't mention your city.
- **Quick fixes:**
 1. Add 30+ real job photos (you have 34).
 2. Tighten the homepage for "garage door repair" + city.
 3. Make sure your profile hours match when you actually answer the phone.

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

4. What I'd fix first

1. **Photos:** 34 → 50+. Real before/after jobs, trucks, team and shop, uploaded steadily rather than all at once. (ongoing)
2. **Website relevance:** put "Garage Door Repair" and "Louisville" in the homepage title; add LocalBusiness schema (address, hours, area served); add an "Areas we serve" section with the suburbs you actually cover.
3. **Hours:** if you take calls evenings or weekends, list those hours. Profiles shown as closed can drop out of "open now" searches. (Only list hours you really answer.)

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Louisville, KY" (downtown point), "garage door repair" to depth 61, pulled Thu Oct 8, 2026 ~4:42 PM ET. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.

- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
