Prepared Thu Oct 8, 2026 by Josh Finer, Finer Technologies · Searches run from downtown Columbus on Thu Oct 8, 2026, ~4:42 PM ET

The 30-second version

- **Solid base:** 4.8★ across 12 Google reviews.
- **But you sit at #85 for "garage door repair"** when searched from downtown Columbus.
 - Compared with the top 3: #1 and #2 have 665–3,325 Google reviews vs your 12; no booking link on your Google profile (2 of the 3 have one); #1 and #2 show 115–145 profile photos vs your 6.
- **Quick fixes:**
 1. Add a booking or quote-request link to your Google profile.
 2. Add 30+ real job photos (you have 6).
 3. Ask every customer for a Google review with a direct link.

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

4. What I'd fix first

1. **Add a booking or quote-request link** to your Google profile (your contact/quote page works if you don't use online booking). (5 min)
2. **Photos: 6 → 50+.** Real before/after jobs, trucks, team and shop, uploaded steadily rather than all at once. (ongoing)
3. **Steer reviews to Google.** Text your direct Google review link after every job and reply to every review. The gap to the top 3 is volume, not quality. (script included in Fix Pack)
4. **Website relevance:** speed up the mobile homepage (lab score 45/100).
5. **Fix your profile hours:** your Mon hours read 8 AM–6 AM on Google (likely a typo). Wrong hours can hide you from "open now" searches. (2 min)
6. **Hours:** if you take calls evenings or weekends, list those hours. Profiles shown as closed can drop out of "open now" searches. (Only list hours you really answer.)

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Columbus, OH" (downtown point), "garage door repair" to depth 147, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
