The 30-second version

- **But you sit at #44 for "garage door repair"** when searched from downtown Kansas City.

- **Quick fixes:**

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

3. Website (mobile)

4. What I'd fix first

1. **Website relevance:** change the main headline (H1) to name the service and city; speed up the mobile homepage (lab score 31/100).

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Kansas City, MO" (downtown point), "garage door repair" to depth 146, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
