The 30-second version

- **Solid base:** 4.5★ across 15 Google reviews.
- **But you sit at #131 for "garage door repair"** when searched from downtown Columbus.
 - Compared with the top 3: #1 and #2 have 665–3,325 Google reviews vs your 15; you list no extra Google categories (#1 and #2 list 2–3); no booking link on your Google profile (2 of the 3 have one).
- **Quick fixes:**
 1. Add 2–3 accurate extra categories to your Google profile.
 2. Add a booking or quote-request link to your Google profile.
 3. Add 30+ real job photos (you have 4).

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

4. What I'd fix first

1. **Add extra categories.** You list only "Garage door supplier". The top 3 also use: Door supplier, Garage builder, Repair service. Add only the ones that are true for your business. (5 min)
2. **Add a booking or quote-request link** to your Google profile (your contact/quote page works if you don't use online booking). (5 min)
3. **Photos: 4 → 50+.** Real before/after jobs, trucks, team and shop, uploaded steadily rather than all at once. (ongoing)
4. **Steer reviews to Google.** Text your direct Google review link after every job and reply to every review. The gap to the top 3 is volume, not quality. (script included in Fix Pack)
5. **Website relevance:** put "Garage Door Repair" and "Columbus" in the homepage title; add an "Areas we serve" section with the suburbs you actually cover.
6. **Hours:** if you take calls evenings or weekends, list those hours. Profiles shown as closed can drop out of "open now" searches. (Only list hours you really answer.)

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Columbus, OH" (downtown point), "garage door repair" to depth 147, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
