5328 Lost Trl, Louisville, KY 40214 · (502) 386-5147 · woodrumoverheaddoors.com

Prepared Thu Oct 8, 2026 by Josh Finer, Finer Technologies · Searches run from downtown Louisville on Thu Oct 8, 2026, ~4:42 PM ET

The 30-second version

- **You do better on narrower searches:** #13 for "garage door spring repair".
- **But you sit at #14 for "garage door repair"** when searched from downtown Louisville.
 - Compared with the top 3: they have 49–725 Google reviews vs your 18; no booking link on your Google profile (1 of the 3 has one); your profile shows weekends closed while 2 of the top 3 list 24/7.
- **Quick fixes:**
 1. Add a booking or quote-request link to your Google profile.
 2. Ask every customer for a Google review with a direct link.
 3. Tighten the homepage for "garage door repair" + city.

1. Where you show up on Google Maps

Search (from downtown Louisville)	Your position	#1
garage door repair	#14 of 61	Elite Garage Door Repair
garage door opener repair	#14 of 67	Elite Garage Door Repair
garage door spring repair	#13 of 59	Elite Garage Door Repair

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

3. Website (mobile)

4. What I'd fix first

1. **Add a booking or quote-request link** to your Google profile (your contact/quote page works if you don't use online booking). (5 min)
2. **Steer reviews to Google.** Text your direct Google review link after every job and reply to every review. The gap to the top 3 is volume, not quality. (script included in Fix Pack)
3. **Website relevance:** put "Garage Door Repair" and "Louisville" in the homepage title; add an "Areas we serve" section with the suburbs you actually cover; speed up the mobile homepage (lab score 45/100).
4. **Hours:** if you take calls evenings or weekends, list those hours. Profiles shown as closed can drop out of "open now" searches. (Only list hours you really answer.)

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Louisville, KY" (downtown point), "garage door repair" to depth 61, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
