The 30-second version

- **Solid base:** 4.3★ across 15 Google reviews.
- **But you sit at #51 for "garage door repair"** when searched from downtown Pittsburgh.
 - Compared with the top 3: you list 1 extra Google category (#1 lists 6); you don't appear in the top 48 for "garage door spring repair" or "garage door opener repair"; your homepage title ("Wright Garage Doors – We make the impossible possible.") doesn't mention your city.
- **Quick fixes:**
 1. Add 2–3 accurate extra categories to your Google profile.
 2. Tighten the homepage for "garage door repair" + city.

1. Where you show up on Google Maps

Search (from downtown Pittsburgh)	Your position	#1
garage door repair	#51 of 60	Spartan Garage Doors
garage door opener repair	not in top 55	Spartan Garage Doors
garage door spring repair	not in top 48	Spartan Garage Doors

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

3. Website (mobile)

Mobile speed (Lighthouse lab)	Performance 46/100 · SEO 92/100 · LCP 10.1 s · page weight 1,620 KiB

4. What I'd fix first

1. **Add extra categories.** You list only "Garage door supplier". The top 3 also use: Door supplier, Garage builder, General contractor, Handyman/Handywoman/Handyperson, Locks supplier, Repair service. Add only the ones that are true for your business. (5 min)
2. **Website relevance:** put "Garage Door Repair" and "Pittsburgh" in the homepage title; change the main headline (H1) to name the service and city; add LocalBusiness schema (address, hours, area served); add an "Areas we serve" section with the suburbs you actually cover; make the phone number a tap-to-call link; speed up the mobile homepage (lab score 46/100).

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps rankings:** DataForSEO Google Maps API, desktop, English, Google location "Pittsburgh, PA" (downtown point), "garage door repair" to depth 60, pulled **Thu Oct 8, 2026 ~4:42 PM ET**. Opener and spring searches pulled the same way.
 - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, star breakdown, photo count, categories, hours, booking link, claimed status) comes from the same Maps results.
- **Website:** homepage HTML check plus Google Lighthouse 12 on mobile (simulated slow 4G, single lab run from our server). Real visitors may see different speeds.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
