Prepared Sat Oct 10, 2026 by Josh Finer, Finer Technologies · Search run for "tree service" with Google location "Tulsa, OK"

The 30-second version

- **Your reviews are strong:** 5★ across 86 Google reviews (85 of them 5-star).
- **But you sit at #4 for "tree service"** in Tulsa. #1 is Tony's Tree Service LLC.
  - Compared with the top 3: homepage title ("ISA Certified Arborist in Tulsa, OK") doesn't mention "tree"; no LocalBusiness schema on the homepage.
- **Quick fixes:**
  1. Tighten the homepage so Google connects it to "tree service" + your area.

1. You vs. the top 3 ("tree service", Tulsa)

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

2. Website (homepage)

Check	Result
Page title	⚠️ "ISA Certified Arborist in Tulsa, OK"
Main headline (H1)	⚠️ "EXPERIENCED ISA CERTIFIED ARBORIST IN TULSA, OK"
Tap-to-call link	✅
LocalBusiness schema	⚠️ not found
HTTPS	✅

3. What I'd fix first

1. **Website relevance:** put "Tree Service" and "Tulsa" (or your home town) in the homepage title; make the main headline (H1) name the service and area; add LocalBusiness schema (name, address/area served, hours, phone).

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps ranking:** DataForSEO Google Maps API, desktop, English, Google location "Tulsa, OK", "tree service" to depth 40, pulled **Sat Oct 10, 2026 ~1:45–2:10 PM ET**.
  - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, photo count, categories, hours, booking link) comes from the same Maps results.
- **Website:** homepage HTML check from our server on the same day.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
