Prepared Sat Oct 10, 2026 by Josh Finer, Finer Technologies · Search run for "tree service" with Google location "Richmond, VA"

The 30-second version

- **Your reviews are strong:** 5★ across 55 Google reviews (55 of them 5-star).
- **But you sit at #24 for "tree service"** in Richmond. #1 is Trees Company RVA.
  - Compared with the top 3: no booking/quote link on the Google profile (1 of the top 3 has one); homepage title ("Tree Service | Midlothian, VA - Greenleaf Tree") doesn't mention Richmond.
- **Quick fixes:**
  1. Add a booking or quote-request link to your Google profile.
  2. Tighten the homepage so Google connects it to "tree service" + your area.

1. You vs. the top 3 ("tree service", Richmond)

	You (#24)	#1 Trees Company RVA	#2 Humanitree Tree Service	#3 Commonwealth Tree Care

Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

2. Website (homepage)

Check	Result
Page title	⚠️ "Tree Service | Midlothian, VA - Greenleaf Tree"
Main headline (H1)	✅ "Tree Service in Midlothian, VA, Providing Everything Trees Need"
Tap-to-call link	⚠️ none found on homepage
LocalBusiness schema	✅ found
HTTPS	✅

3. What I'd fix first

1. **Add a booking or quote-request link** to your Google profile. Your contact/estimate page works if you don't use online booking. *(5 min)*
2. **Website relevance:** put "Tree Service" and "Richmond" (or your home town) in the homepage title; make the phone number a tap-to-call link.

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps ranking:** DataForSEO Google Maps API, desktop, English, Google location "Richmond, VA", "tree service" to depth 40, pulled **Sat Oct 10, 2026 ~1:45–2:10 PM ET**.
  - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, photo count, categories, hours, booking link) comes from the same Maps results.
- **Website:** homepage HTML check from our server on the same day.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
