Distance from the searcher is part of how Google ranks Maps results, and you can't change it. What you can change: relevance (categories, services, website) and prominence (reviews, photos, activity).

2. Website (homepage)

3. What I'd fix first

1. **Add a booking or quote-request link** to your Google profile. Your contact/estimate page works if you don't use online booking. *(5 min)*

No one can guarantee rankings. These fixes target what you control.

How this was measured

- **Google Maps ranking:** DataForSEO Google Maps API, desktop, English, Google location "Raleigh, NC", "tree service" to depth 40, pulled **Sat Oct 10, 2026 ~1:45–2:10 PM ET**.
  - Rankings move by searcher location, device and time. This is a snapshot, not a guarantee.
- **Profile data** (rating, photo count, categories, hours, booking link) comes from the same Maps results.
- **Website:** homepage HTML check from our server on the same day.
- Anything marked **(verify)** is an inference we couldn't confirm from the data.
